OILCATS Service	Service Description
Requirements Analysis	OILCATS will provide a Subject Matter Expert (SME) to assist the Client in Requirements Gathering, Developing the Project Scope, Project Timetable, Project Definition and Project Costing.
Statement of Work Development	OILCATS will provide a Project Team to meet with the Client's representatives to develop the Project Statement of Work (SOW). The SOW will include, but not be limited to, the development and agreement of a Project Plan, Noun/Qualifier, Abbreviation and Short Text Description formats.
Potential Duplicate Analysis Reports	<i>OILCATS offers two levels of Potential Duplicate Analysis Reporting.</i> Level 1 – Report matches items by Manufacturer/Supplier and Part Number – normally conducted at the beginning of a Project and prior to any items being cataloged. This report can also be provided as a stand-alone service. Level 2 – Report matches cleansed and enhanced descriptions, Noun/Qualifiers and Attributes and Values and Manufacturer/Supplier and Part Number at the end of a Project and prior to the data being downloaded to the Client.
GUNK® Level 1 – Classify	The Source Description for each item will be classified to a GUNK® Noun/Qualifier template and any of the UNSPSC, PIDX, eCI@ss, eOTD, NATO and FPAL Codes.
GUNK® Level 2 – Cleanse	The Source Description for each item will be parsed to the GUNK® Attributes and the Values will be standardized for consistency. The Manufacturer/Supplier Names will also be standardized.
GUNK® Level 3 – Enhance	The Source Description will be researched by SMEs and additional information will be collected to enhance and enrich the descriptive information for the Qualified Description. The additional information will be collected through a combination of SME domain expertise, investigating the Internet and interrogating Manufacturer/Supplier catalogs and operating manuals.

OILCATS Service	Service Description
Field Data Collection (North America)	Items that cannot be identified accurately from the Source Description or from collecting additional research at Level 3 above must be verified in the field to be included in the catalog. This service includes Material Analysts on-site collecting the missing information and incorporating it into the catalog.
Field Data Collection (International)	Items that cannot be identified accurately from the Source Description or from collecting additional research at Level 3 above must be verified in the field to be included in the catalog. This service includes Material Analysts located onsite collecting the missing information and incorporating it into the catalog.
Catalog Maintenance Using GUNK®	OILCATS offers an on-going service after a Project is completed to maintain the catalog using the GUNK® Data Dictionary, SMEs and the Quality Assurance methods that were used in the original Project. Additional services associated with creating items in the active customer catalog will also be provided.
Catalog Maintenance Secure Remote Access Direct into Client System	OILCATS offers an on-going service after a Project is completed to maintain the catalog using secure remote access into the client system, SMEs and the Quality Assurance methods that were used in the original project. Additional services associated with creating items in the active customer catalog will also be provided.
GUNK® ASP Services	OILCATS will make GUNK® available as an Application Service Provider (ASP) model for use in maintaining a customer's catalog by the customer's personnel. This service includes full use of GUNK®, Custom Export Formats, Dictionary Maintenance and Cataloging Help Desk.
Planned Maintenance Bill of Materials	OILCATS offers a service of conducting investigative research into Vendor Spare Part Listings and Operational Documentation to identify and extract additional information required to populate P.M. Bills of Materials, procure the spares and enhance the catalog descriptions.
Best Practice Consulting Services	OILCATS will provide Best Practice Consulting Services to assist the Client in Planned Maintenance, Supply Chain Management and Data Management.
